Plasser American

1000 Hour OEM Filter Kits with Far-Reaching Impact

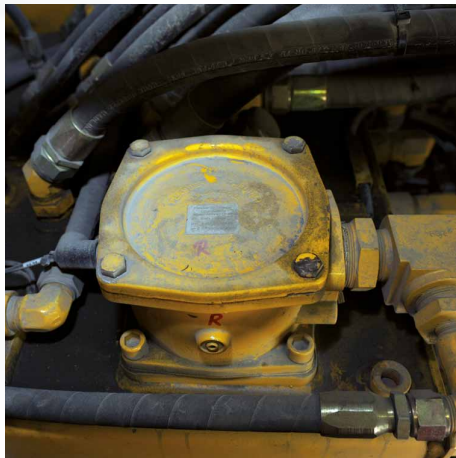

Ensure Optimum Availability

Quality Cuts Costs

A PERFECTLY FUNCTIONING UNITY

Machines built by Plasser American are complex systems. Parts adapted precisely to one another act perfectly and guarantee a reliable and cost-efficient deployment of the machine.

OEM spare parts and wear parts offered by Plasser American are manufactured exactly to meet the requirements of our machines. Consequently, they guarantee a perfect functioning of the machine over long periods.

LOW INVESTMENT IN COST-EFFICIENT OPERATION

The pressure of reducing costs requires the customer to use every opportunity possible to find more advantageous and cost-efficient solutions. One could be by extending the intervals between parts replacements or by using non-OEM parts. Although the reasons for this may be understandable, the consequences are not without serious risks.

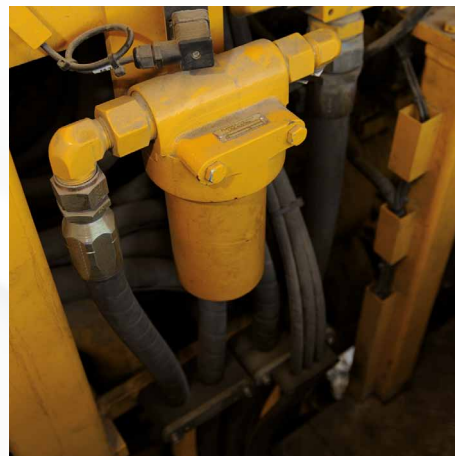

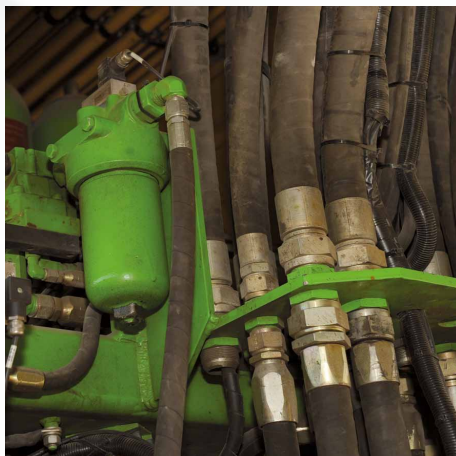

When damage occurs, it is often small parts that have a major impact on the entire machine. Studies and practical experience have confirmed again and again that using cheaper solutions, filter cartridges in particular, can actually lead to more expensive operations.

OEM FILTER CARTRIDGES KEEP THE HYDRAULIC SYSTEM CLEAN AND IN GOOD WORKING CONDITION

An important function of filter cartridges is to prevent contamination of the hydraulic system. Our OEM filter cartridges guarantee this function for the specified replacement cycle.

If OEM filter cartridges are not replaced within a cycle or if cheaper filter cartridges are used, there is a risk that dirt particles will enter the hydraulic system. In the worst case, this can cause a failure of the machine. In practice this means: higher costs for the repair and problems keeping the deadline for completing the work.

OEM filter cartridges offer the most effective protection against contamination of the hydraulic system.

Planning Saves Cost

TWO NEW OPTIONS TO ORDER OEM FILTER CARTRIDGES OFFERED BY PLASSER AMERICAN

Good management of the wear parts is required in order to have the matching filter cartridges available at the right time. This will reduce the costs involved.

Plasser American therefore now offers two attractive options: the 1000 HOUR FILTER CARTRIDGE PACKAGE and the discounted bulk ordering capability.

1000 HOUR FILTER CARTRIDGE PACKAGE: ALL FILTER CARTRIDGES FOR 1,000 OPERATING HOURS

The 1000 HOUR FILTER CARTRIDGE PACKAGE contains all filter cartridges for hydraulic, pneumatic and power systems of one machine that have to be replaced within 1,000 operating hours. We put together every package individually to suit your machine!

Your benefit

- Cost reduction of up to 20 %
- Guaranteed original quality
- 100% correct order
- Advance stocks of the correct filter cartridges
- Undisrupted operation thanks to calculable service and maintenance

If required, filter cartridge packages can also be customized in accordance with the customer's wishes.

Filter cartridges are only a small part of the larger systems. Yet, their good functioning contributes toward cost-efficient operation of your machines.

Our Offer

Plasser American

OEM FILTER CARTRIDGES AS A BULK ORDER

For customers with large fleets of machines, as an alternative to the 1000 HOUR FILTER CARTRIDGE PACKAGE, it is now possible to order large quantities as a single order. Price reductions depending upon the quantity ordered; e.g. 20 filters -10%; 40 filters -20% special discount.

ORDERS CAN BE PLACED IMMEDIATELY!

Both the 1000 HOUR FILTER CARTRIDGE PACKAGE and bulk orders can be supplied immediately.

To order the 1000 HOUR FILTER CARTRIDGE PACKAGE either the part number or the machine model and machine number are needed. For new machines, the part number of the 1000 HOUR FILTER CARTRIDGE PACKAGE can be found in the service manual and in the spare parts catalogue.

Please consider that having a reserve filter cartridge package on hand can be crucial for the operation of your machine!

Orders can be placed and information can be obtained from:
